SUMMARY

I am an IT software developer with 2 years of experience in developing innovative and responsive web applications. Proficient in React.js, PHP, Yii2, and Laravel. Experienced in managing complex web systems such as ERP and employee attendance systems. Skilled in database management, API integration, as well as application testing and debugging. Dedicated to delivering efficient, high-quality technical solutions and working effectively in cross-functional teams.

PROFESSIONAL EXPERIENCE

PT. Herca Cipta Dermal Perdana – Jakarta, Indonesia

IT Developer (August 2023 – July 2024)
- Developed web and mobile applications from scratch to launch, focusing on innovation and efficiency.
- Managed complex system integrations to improve company productivity and performance.
- Collaborated with cross-disciplinary teams to identify and resolve technical challenges.
- Utilized version control systems such as Git for collaboration and source code management.
Key Skills & Technologies: Laravel Framework, Yii2 Framework, React.js, Bootstrap
Main Projects:
- **ERP (Enterprise Resource Planning):** Built and implemented an ERP system to manage various business functions such as trends, product trends, and customer trend reports.
- **Employee Attendance System:** Developed a web-based attendance system with time tracking, leave management, and monthly attendance reporting features. Integrated with facial recognition devices and mobile applications.
- **Inventory Management:** Developed an inventory management application enabling efficient stock tracking and management.

PT Bank DBS Indonesia – Jakarta, Indonesia

Clean Up Project (October 2017 – June 2023)
- **Data Entry Support (Oct 2017 – Oct 2018):** Performed data entry for BAU applications in the customer data entry system.
- **Quality Control (Oct 2018 – Feb 2025):** Conducted data quality checks, verification, and re-checking of customer information in the system.
